-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Drawings*

1. The drawings submitted on May 20, 2004 have been accepted by the examiner.

### *Specification*

2. Applicant is reminded of the proper format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin'338 (US Patent No. 4,054,338) in view of Steadman (US Patent App Pub No. US 2004/0066121 A1).

Martin'338 discloses a dental supply cart comprising a base unit 12, a top member 14, and a rotating means 24,26 interposed between the base unit and top member allowing the top member to be rotated relative to the base unit (col. 1, lines 39-45; see Figure). The rotating means comprises a first plate 22 attached to the base unit having a bearing race 26, a second plate 28 attached to the top member having a bearing race, and a plurality of bearings 24 captured between the bearing races of the first and second plate (see Figure). However,

Art Unit: 3732

Martin'338 does not disclose a supply cabinet attached to the top member, a movable slide member, or a shelf member.

Steadman teaches a storage apparatus 10, with a supply cabinet 54 attached to a base, a movable slide member 22,32 permitting forward and rearward movement with respect to the base, and a shelf member 56 between the movable slide member and the base (page 1, para. [0008] and page 2, para. [0024]; see Figures 1 and 2). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the dental supply cart of Martin'338 to incorporate the teachings of Steadman to create a dental cart with a supply cabinet attached to the top member, a movable slide member interposed between the base unit and top member, and a shelf member interposed between the movable slide member and the top member to provide greater accessibility to the cabinet's contents regardless of the user's orientation to the dental supply cart while working with a patient.

### *Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent No. 3,304,609 to Horowitz et al discloses a dental equipment unit having a head unit with three vectors of motion.
